CURRENT LIST of MEDICAL LITERATURE

VOL. 2 February 5, 1942 Supplement I

SUBJECT GROUPS ACCORDING TO JOURNALS

1. Anatomy; Histology
2. Anthropology; Ethnology
3. Archeology; Paleontology
4. Aviation Medicine
5. Bacteriology; Parasitology
6. Biology; Embryology
7. Bone; Joint; Extremities; Muscle
8. Cancerology
9. Cardiovascular System
10. Chemistry; Physics
11. Dentistry; Stomatol
12. Dermatology
13. Diagnosis; C ds
14. Dietetics: ition
15. Diges
16. E
17. Fo dicine; Toxicology
18. Genet Eugenics
19. Gynecology; Obstetrics
20. Hematology
21. History; Biography; Bibliography
22. Homeopathy; Osteopathy, etc.
23. Hospitals
24. Immunology; Serology
25. Industrial Hygiene; Sociology
26. Infectious Diseases; Epidemiology
27. Medicine
28. Metal
29. M Naval Medicine
30. us
gy; Psychiatry
ing
phthalmology
. Otorhinolaryngology; Phoniatry
35. Pathology
36. Pediatrics; Child Welfare
37. Pharmacology; Pharmacy
38. Physiology
39. Psychology; Mental Hygiene
40. Public Health; Sanitation
41. Radiology; Phototherapy
42. Respiratory System
43. Surgery; Traumatology
44. Therapeutics
45. Tropical Medicine
46. Tuberculosis
47. Urology
48. Venereal Diseases; Sexology
49. Veterinary Medicine
50. Zoology

RECENT BOOK ACQUISITIONS

EXECUTIVE COMMITTEE OF THE

FRIENDS OF THE ARMY MEDICAL LIBRARY

Washington, D. C.

BOOKPLATES

The Ex-Libris is merely a printed or engraved label indicating ownership in individual volumes, and it is nearly as old as the printed book. The oldest known bookplates are wood cuts representing a shield of arms supported by an angel. These were used in Germany by Brandenburg about the year 1480, although some authorities have placed other bookplates at an even earlier date. In France they did not appear until more than half a century later, and Cardinal Wolsey is said to have used one in England about the same period. The bookplate appeared in Italy early in the 17th century, and the earliest known American example is that of a label of John Cotton printed in 1674.

The student of the history of the bookplate will find his best hunting ground is Germany, since they are there found in greatest number and because of their superior artistry. Albrecht Dürer, for example, is known to have engraved at least six plates early in the 16th century. It has been noted that the many artists who influenced the decorative styles of Germany influenced also the French and Italian bookplates as late as the 18th century.

The study of bookplates is a fascinating pursuit and may well engage one in his leisure hours throughout a lifetime. Perhaps the most interesting bookplates from the American standpoint are the English ones which date from the time of Queen Elizabeth and continue to the end of the Victorian period. They are not nearly as numerous as the German, nor are they as elaborate, but they have many distinctive and engaging characteristics.

After the Restoration, a bookplate seems to have become an established accessory to the well-ordered library. Most of the older plates are pictorial and one of the commonest and best defined is known as the Library Interior. The writer applied this unconsciously when he was very young, in the selection of his own bookplate, which represented an elderly physician holding a skull in his hand while seated in the interior of a library which was then non-existent. To cap the climax this budding bibliophile larded in "Labor voluptasque inter se sunt juncta", which is to the effect that labor and pleasure go hand in hand, and to which sentiment he no longer subscribes.

The value attached to bookplates, except for their personal interest, is comparatively recent, and it is doubtful if any very large collections were made before the last quarter of the 19th century. About that time appeared a book "A Guide to the Study of Bookplates" by Warren in England, and this work established the present classification of style such as early armorial, Jacobean, Chippendale, Wreath and Ribbon, etc.

Naturally it is to be expected that many bookplates will not conform to the established order, indeed many seem to have been devised for the gratification of the owner's ego. Many are in bad taste and many reflect not the ingenuity or thought of the person to whom they relate, but the routine skill of the heraldic stationer. Today a large number of libraries, including three medical libraries according to a recent survey, have interested themselves in special collections of bookplates.

H.W.J.

ARMY MEDICAL LIBRARY

RECENT BOOK ACQUISITIONS

February 1942. Washington, D. C. Vol. 4. No. 1.

Publications received during the period

from November 1, 1941 to January 31, 1942.
